Fewer than 15 Canadians in a million are organ donors? It's true. Canada's organ donation rate ranks in the bottom half of countries in the western world where transplants are performed. More than 3,500 Canadians are waiting for an organ transplant, and every year nearly 150 of them die waiting. We have some of the best transplant technology in the world, some of the most highly skilled surgeons, some of the most prestigious transplant hospitals, but there are never enough organs available to save enough lives.
